### **DETAILED ACTION**

1. This action is responsive to communications: application, filed 08/05/1999; amendment filed 03/04/2004.
2. Claims 1-38 are pending in the case. Claims 1, 7, 24, 28, and 36, are independent claims.

### ***Response to Amendment***

3. Applicant argues that "The Saito reference at least does not suggest or disclose 'each of the plural trust levels corresponding to a respective set of credential types...mapping rule establishing a correspondence between the sufficient trust level and the respective set of credential types therefore'." Applicant also argues Saito does not "disclose or suggest a correspondence between each of plural trust levels and a set of credential types" or "suggest a mapping rule as in claim 1 that establishes correspondence between a trust level and its set of corresponding credential types."

4. Applicant's arguments, see pages 9-11, filed 03/05/2004, with respect to the rejection(s) of claim(s) 1-14, 17-25, and 27-38 under Saito et al. have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. Patent No 6,691,232 B1 to Wood et al.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 23-26 of U.S. Patent No. 6,691,232 B1 to Wood et al. Although the conflicting claims are not identical, they are not patentably distinct from each other. Claim 1 of the patent application discloses "a gatekeeper interposed between the client entity and the information resources; and a credential gathering service common to the plural information resources". This is an obvious modification from the already patented claims. The already patented claims disclose an access control facility common to the plural information resources, the common access control facility obtaining a credential for the client entity and authenticating the client entity thereby. The gatekeeper and the credential gathering service is an obvious modification of an access control facility which also obtains credential for the client entity and authenticates the client entity as claimed by Wood et al. If one system performs two different functions it would be obvious to split up the functions so two separate systems perform the same two functions independently.
